Login system

Onboarding Screens

- The app should display four onboarding screens when first opened.
- There should be a "Skip" button allowing users to bypass onboarding.
- After onboarding, users should be directed to an authentication selection page with two options:
 - Log in
 - Register a new account

onboarding is only displayed when the user opens the app for the first time

User Registration

- When registering a new account, users must provide:
 - First name
 - Last name
 - Email
 - Phone number
 - Password
 - Confirm password
- After entering their details, users must verify their account through either email or phone number (user can choose).

User Login

- Users log in using email and password.
- Additional options:
 - "Forgot password" link.
 - "Remember me" checkbox.
 - Option to log in using Google or Facebook.

Bottom Navigation

Bottom Navigation (AppBar/TabBar)

The app should have five main pages in this order:

1. Home
2. categories
3. Add
4. Messages
5. Profile

1. Home Page

- Top Section (AppBar):

- User profile picture
- "Hello, [Username]" text
- Drawer icon

- Content:

1. Top Stories – Best stories from all categories
2. Trending Items – Best items of the day
3. Keyword Boxes – Display relevant search keywords based on user interest (navigates to search results)
4. Recently Viewed Items – List of the last seen items
5. New Items Near Me – Latest items posted nearby

2. Categories Page

- Top Section (AppBar):

- User profile picture
- "Hello, [Username]" text
- Drawer icon

- Content:

1. Search bar and filter icon – Search field and general filter option for all categories
2. Categories – Horizontal scrollable list of:
 - SellX
 - Properties
 - Cars
 - Boats
 - Motorcycles
 - Bicycles
 - Jobs
 - Electronics
 - Books

- Furniture
- Clothing

3. Relevant Items – Displayed based on user activity (from all categories)

3. Add Page

- Functions:
 - Add new items
 - View existing items (with number of views, number of likes, item status (active, expired, rejected) price (the user should be able to click on their items as well to open and see them as they appear to everyone))
 - Edit, delete, or mark items as Sold/Rented/Given Away
 - show both active items and started ones (drafts) (separate them with a Tab bar)

4. Messages Page

- Displays:
 - Conversations between users

5. Profile Page

- User Information:
 - Profile picture
 - Bio
 - Email
 - Phone number
 - Membership date
 - Option to edit profile information
 - delete account

drawer

Drawer Menu

1. Top Section

- **User profile picture**
- **Email**
- **Full name**
- **Verification check icon** (if the user is verified)

2. Menu Items

1. **Favorites** – Saved items
2. **Ratings & Reviews** – User's received reviews (star ratings and comments)
3. **Notifications** – Alerts from saved searches and general notifications
4. **Payments** –
 - List of completed transactions
 - Saved payment methods
5. **Contact Us** –
 - Option to call or send a message to support
6. **Terms & Conditions** – View app policies
7. **Privacy Policy** – View data protection information
8. **Settings** –
 - Control notifications (toggle on/off for messages and other alerts)
9. **About the App** – Information about **SelIX**
10. **Dark/Light Mode Toggle** – Switch between themes
11. **Log Out** – Sign out of the account

adresses

These addresses should always be used (filtering, selecting the desired house for rent, etc.)

Areas (Områder):

1. Agder

- Arendal

add-sellx-items

SellX Category - Item Listing Form

Fields:

1. **Images** – Upload multiple images of the item
2. **Transaction Type** – Options:
 - **Sell (default selection)**
 - **Buy**
 - **Give Away**
3. **Title** – Headline for the item
4. **Description (Required)** – Detailed information about the item
5. **Condition** – Select between:
 - **New**
 - **Used**
6. **Brand Name** – (e.g., Rolex, Apple)
7. **Price / Max Price (if buying)** – Set a selling price or a max price if looking to buy
8. **Address (Required)** –
 - **Postal code**
 - **City**
 - **Street**

Privacy Settings (Applies to All Categories):

- Users can choose to **hide their name, profile picture, and phone number** until a buyer/contact initiates a conversation.

add_properties_items

Properties Category - Listing Form

General Fields:

1. **Images** – Upload multiple images of the property
2. **Property Type Selection** (User must first select one of the following):
 - **For Rent**
 - **For Sale**
 - **Wanted to Rent**
 - **Cabins**
 - **Land Plot**

If "For Sale" is selected:

Basic Information:

3. **Listing Title (Required)**
4. **Address (Required)** – Postal code, City, Street
5. **Access Description**
6. **Location Description**
7. **Neighborhood Name**
8. **Property Type (Required)** – Options:
 - Detached House, Garage, Farm, Apartment, Townhouse, Semi-Detached, Other
9. **Ownership Type (Required)** – Options:
 - Stock, Share, Owner, Bond, Other

Official Identification Numbers:

10. **Municipality Number (Required)** –
11. **Farm Number (Required)** – *(Number of the farm unit, found on the local land registry website.)*
12. **Usage Number (Required)** – *(Each farm number is divided into usage numbers, found on the local land registry website.)*
13. **Section Number** – *(Assigned when the property is sectioned, found on the local land registry website.)*
14. **Leasehold Number** – *(Used when a usage number is divided into multiple properties, found on the local land registry website.)*
15. **Apartment Number** – *(Consists of a letter (H, L, U, K) and four digits, e.g., H0201 for the first apartment on the second floor.)*

Area Details:

16. **Usable Area (Required)** – *(Gross area minus space occupied by external walls. Found in the valuation report.)*
17. **Internal Usable Area** – *(Area within the unit itself.)*

18. **External Usable Area** – *(Area outside the unit, such as storage rooms.)*
19. **Terrace/Balcony Area** – *(Area of terraces, balconies, or open patios attached to the unit.)*
20. **Primary Rooms Area** – *(Only includes primary rooms, secondary rooms are excluded. Found in the valuation report.)*
21. **Ground Area** – *(The footprint of the building on the plot.)*
22. **Area Description** – *(Brief overview of the sizes of different rooms in the property.)*

Construction Details:

23. **Year Built (Required)**
24. **Year Renovated**
25. **Energy Rating (A-G)** – *(A = most efficient, G = least efficient. Based on estimated delivered energy.)*
26. **Heating Rating** (Yellow, Light Green, Dark Green, Orange, Red) – *(Indicates the share of fossil fuel and electricity used for heating. Dark green = <30%, Red = >82.5%.)*

Rooms & Facilities:

27. **Number of Bedrooms (Required)**
28. **Total Number of Rooms** – *(Excluding storage rooms and garages.)*
29. **Floor Level**
30. **Facilities** (Checkbox options for each):
 - Air Conditioning, Rooftop Terrace, Shared Laundry, No Overlooking Neighbors, Modern, Fireplace, Scenic View, Fishing Spot, Alarm System, Balcony/Terrace, Child-Friendly, High-Speed Internet, Parking/Garage, Elevator, Cable TV, EV Charging, Public Water/Sewage, Hardwood Floors, Quiet Area, Central Location, Security Service, Swimming Spot, Beachfront, Hiking Trails

Land Details:

31. **Plot Size**
32. **Lease Term** (If applicable)
33. **Lease Fee** – *(Current lease fee for the land.)*
34. **Plot Characteristics** – *(Describe landscaping, driveway, parking, and public regulations.)*

Financial Information:

35. **Shared Costs (Required)**
36. **Shared Costs After Interest-Free Period** – *(Estimate if shared debt applies.)*
37. **Shared Costs Include (Required)** – *(Breakdown of total monthly costs.)*
38. **Property Tax Value (Required)** – *(Used for tax calculations. More info available on the tax authority's website.)*
39. **Listing Price (Required)** – *(Minimum selling price.)*
40. **Additional Costs (Required)** – *(List any extra transaction fees. Enter 0 if none.)*

41. **Additional Costs Include (Required)** – *(Breakdown of extra costs.)*
42. **Shared Debt (Required)** – *(If none, set to 0.)*
43. **Total Price** (Auto-calculated as: **Listing Price + Shared Debt + Additional Costs**)
44. **Appraisal Value** – *(Estimated market value set by a property appraiser.)*
45. **Loan Value** – *(Value used by banks for loans and foreclosure purposes.)*
46. **Shared Equity** – *(Owner's share of the building association's total equity.)*
47. **Annual Municipal Fees**
48. **Annual Property Tax**
49. **Additional Information on Shared Debt & Costs** – *(Optional details about financing.)*
50. **Right of First Refusal** – *(Specify if a preemptive right exists and when it applies.)*

Additional Property Details:

51. **Property Description**
52. **Video Link** – *(Embed a YouTube video link.)*
53. **360° Virtual Tour Link** – *(Supported platforms: Matterport, H5|Property, Diakrit, etc.)*
54. **Attach File (PDF)** – *(Upload an additional document.)*

Viewing Schedule:

55. **Viewing Date** – *(Format: DD.MM.YYYY or MM/DD/YYYY)*
56. **From Time** – *(Format: HH:MM)*
57. **To Time** – *(Multiple time slots can be added.)*

Contact Information:

58. **Phone Number** – *(Contact number for potential buyers.)*

If "Property for Rent" is selected:

1. **Images**
2. **Ad title** (required)
3. **Address** (postal code, city, street) (required in all categories)
4. **Property type** *(Detached house, Garage, Farm, Apartment, Townhouse, Semi-detached, Other.)*
5. **Primary rooms area** (required) *(Area of primary rooms; secondary rooms are not included. Available in the valuation report.)*
6. **Internal usable area** *(The area inside the residential unit.)*
7. **External usable area** *(Area of rooms outside the residential unit that belong to it, such as storage rooms.)*
8. **Terrace and balcony area** *(Area of terraces, open balconies, and open altans connected to the unit.)*
9. **Number of bedrooms** (required)
10. **Furnishing** *(Furnished, Partially furnished, Unfurnished.)*

11. **Monthly rent** (required)
12. **Deposit**
13. **Included in rent** (*E.g., electricity, internet, etc.*)
14. **Rental period start date**
15. **Rental period end date**
16. **Property description**
17. **Viewing date**
18. **From time**
19. **To time**
20. **Additional remarks**
21. **Phone number** (*Contact number for interested tenants.*)

If rental is desired:

1. **Preferred rental area:**
Agder, Buskerud, Kristiansand, Oslo, Svalbard, Trondheim, Vestland, Akershus, Finnmark, Møre og Romsdal, Rogaland, Telemark, Trøndelag, Østfold, Bergen, Innlandet, Nordland, Stavanger, Troms, Vestfold
2. **Preferred property type:**
Studio apartment, Garage/Parking, Semi-detached house, Detached house, Room in shared housing, Townhouse, Apartment, Other
3. **Number of tenants**
4. **Furnishing** (Furnished, Partially furnished, Unfurnished)
5. **Desired move-in date** (Date)
6. **Maximum monthly rent**
7. **Option to upload images**
8. **Ad title**
9. **Description** (Write a short introduction about yourself. Who are you, and what kind of housing are you looking for? Do not include contact information such as email or phone number in this field.)
10. **Phone number**

If "Cabins for sale" is selected:

akkurat samme som "for salg"

add_car_items

1. First you have to choose between these (car for sale, car for rent, bobil, caravan).

if the user selects "Car for sale **OR** car for rent":

General info:

1. images
2. tax class (required) (Combi, Light truck, Minibus, passenger car, Van, Other)
3. Registration number
4. Chassis number (write this description under the text field: It is listed on the first page of the vehicle registration. You can also find it on vegvesen.no.)
5. Model year (required)
6. Car brand (see car_brands_and_bodels) (required)
7. Car model (see car_brands_and_bodels) (required)
8. Model specification (write this description under the text field: Max 70 characters, e.g. 520d xDrive, 330i Sport or 1.6 EcoBoost.)
9. The car is parked in (Norway, Abroad)
10. Fuel (required) (Petrol, Diesel, El, Gas, Gas+petrol, Gas+diesel, Hybrid gasoline, Hybrid diesel, Hydrogen).
11. Power in hp
12. Is or has the car's engine been tuned? (Yes / No) (Write this description below the text field: If the engine has been mechanically or electronically tuned for more power / horsepower, you must state this.)
13. Transmission (required) (Automatic, Manual)
14. Transmission designation (For example: Steptronic, 4-MATIC, or manual 6-speed)
15. Wheel drive (required) (Rear-wheel drive, Front-wheel drive, All-wheel drive)
16. Wheel drive designation (For example: xDrive, 4WD or 4MOTION.)

Body and color:

17. Body type (required) (Convertible, Coupe, MPV, Box, 3-door Hatchback, 5-door Hatchback, Pickup, SUV/Offroad, Sedan, Estate, Other)
18. Number of seats (required)
19. Number of doors
20. Trunk volume in liters
21. Vehicle weight in kg
22. Max. trailer weight in kg
23. Main color (required)
24. Color description (Example: Sun Yellow, Sky Blue, Obsidian Black, Glacier White.)
25. Interior color (Example: Carbon Black, Starry Sky, Sea Green, Titanium Gray.)

Equipment:

26. car equipment: (there should be a check box next to them that allows the user to select the ones that fit)

4. **Description (Required)** – Detailed information about the item
5. **Condition** – Select between:
 - **New**
 - **Used**
6. **Book category**– (Videregående bøker, Universitetsbøker, Barnebøker, Romaer)
7. **Price / Max Price (if buying)** – Set a selling price or a max price if looking to buy
8. **Address (Required)** –
 - **Postal code**
 - **City**
 - **Street**
 - **Country (Norge)**

Privacy Settings (“”””Applies to All Categories””””):

- Users can choose to **hide their name, profile picture, and phone number** until a buyer/contact initiates a conversation.

add_furniture_items

Furniture Category - Item Listing Form

Fields:

1. **Images** – Upload multiple images of the item
2. **Transaction Type** – Options:
 - **Sell (default selection)**
 - **Buy**
 - **Give Away**
3. **Title** – Headline for the item
4. **Description (Required)** – Detailed information about the item
5. **Condition** – Select between:
 - **New**
 - **Used**
6. **Brand Name** – (e.g., Ikea, Samsung, LG)
7. **Price / Max Price (if buying)** – Set a selling price or a max price if looking to buy
8. **Address (Required)** –
 - **Postal code**
 - **City**
 - **Street**
 - **Country (Norge)**

Privacy Settings (“”””Applies to All Categories””””):

- Users can choose to **hide their name, profile picture, and phone number** until a buyer/contact initiates a conversation.

add_clothing_items

Clothing Category - Item Listing Form

Fields:

1. **Images** – Upload multiple images of the item
2. **Transaction Type** – Options:
 - **Sell (default selection)**
 - **Buy**
 - **Give Away**
3. **Title** – Headline for the item
4. **Description (Required)** – Detailed information about the item
5. **Condition** – Select between:
 - **New**
 - **Used**
6. **Brand Name** – (e.g., Adidas, Nike, Gant)
7. **Price / Max Price (if buying)** – Set a selling price or a max price if looking to buy
8. **Address (Required)** –
 - **Postal code**
 - **City**
 - **Street**
 - **Country (Norge)**

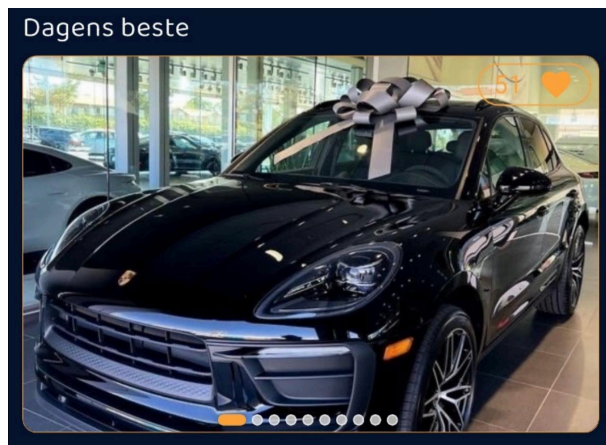

Privacy Settings (“”””Applies to All Categories””””):

- Users can choose to **hide their name, profile picture, and phone number** until a buyer/contact initiates a conversation.

category_pages

Category pages should look the same. in this order:

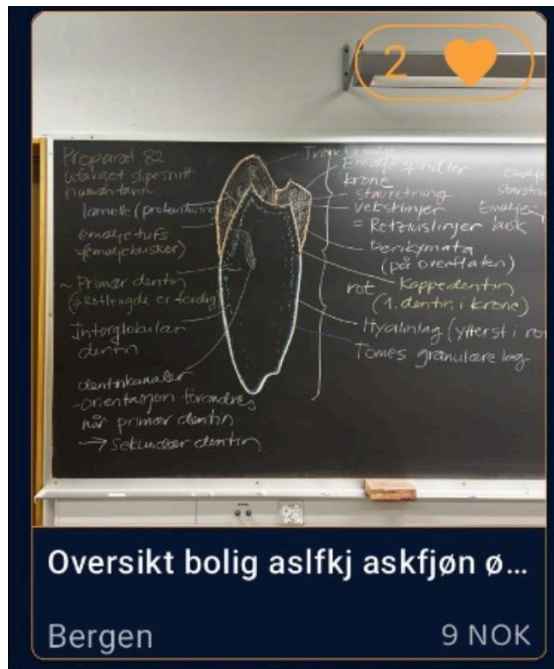

1. at the top there should be an appbar (with back icon, category name, and drawer)
2. search field that belongs to this category, and filter icon (which filters only this category)
3. all other categories are displayed with boxes as a list with the possibility of horizontal dragging (to see other categories) (this part should be like a "sticky header" - fixed at the top when scrolling)
4. stories that belong to this category (which should be paid to add)
5. today's best items (best items should be displayed by most likes "added as favorites", and they change every 24 hours, at 0600 Norwegian time)

almost like that

6. keyword suggestions (based on user activity) (only 10 keywords)
7. relevant items that belong to this category (based on user activity)

items_shown_from_the_outside

From the outside, items should look like this (image, favorite icon, in bottom should be items header, in bottom left should show item city, and bottom right should show item price)

don't look at the design on this image and just follow the design you want that fits in the app

items_from_inside

when it comes to items from the inside (when open an item), there should be a different structure for the different categories, based on what information you write when you add items to the different categories.

but it should be the general structure:

1. images (which shows the number of current and total images, e.g. 1/22).
2. title
3. number of likes
4. etc

If it is a large text, like for example a description, put it in for example "ExpansionTile", or show the top of the text but button "read more +"

at the very bottom I want to show:

0. information for the items owner (seller)
 1. items added date (or last modified)
 2. box with a map that opens when clicked on and shows the items address.
 3. a button "report item "
5. 10 - 15 items related to this item

saved_search

For saved searches, it should be based on filtering a search. When the user searches for something first, also filters their search as, for example (price: up to 20000, area: Oslo, brand: BMW, model: 1-serie). The user should be able to save the search with these filters, and should get notifications every time an item is added and matches this search.

saved searches should be displayed on a page under Drawer, and there the user should have an overview of all saved searches, with the option to delete or edit.

when the user clicks on a saved search, the search should be opened again and show all items (exactly back to the page when the searcher saved the search)

payment_methods

Payment should only be available with bank cards, with the option to save the bank card

Overview of saved bank cards should be displayed under the "payment methods" page, with the option to remove or edit

payment should be made on:

1. if the user posts a new item (different prices depending on category)
2. if the user wants more visibility on their items (items should be shown first even after sorting)
3. when they post stories for their items
4. there should be a coupon option
5. it should be possible to buy a package of items for example 10 items, then it is cheaper

sellx_filter

The words between brackets are in Norwegian. names of the areas are at the bottom of the document.

Categories:

1. SELLX: this category is for everything else that does not have its own category

- Area (Område)

 1. Til salgs
 2. Til leie
 3. Gis bor
 4. Ønskes kjøpt

sellx_stories

Stories Feature

Users should be able to post their own stories for a fee. Inside the story, the design should resemble a typical story format, similar to Instagram.

Story Details:

- The duration of a story should be based on the user's selection (e.g., 24, 48, 72 hours, etc.).
- Users can reference as many items as they want within the same story.
- Each referenced item should display:
 - The date
 - The seller's name
 - A button that opens the item listing
 - Images (users should be able to add multiple images within the same story for the same item)

Story Placement & Scrolling:

- The appearance of stories from the outside is not important.
- However, they should be placed at the top of the screen.
- Users should be able to scroll through them horizontally.

Story Categories:

- Stories should be displayed under their respective categories.
- On the **home page**, stories from all categories should be visible together.

sellx_ratings

Proposal for Implementing a Trustworthiness System in Sellx

1. Standard Ratings (Stars + Comments)

Buyers can rate sellers from 1 to 5 stars after a completed sale.

They can also leave a comment about their experience.

2. Trustworthiness Score (Sellx Trust Score)

Sellers receive a trustworthiness score (e.g., from 0 to 100) based on objective factors:

Response Time – How quickly the seller responds to messages. Displayed on listings as, for example, "Usually responds within 10 minutes."

Completed Sales – How many listings the seller has posted and successfully sold.

Positive Feedback – Number of 4- and 5-star ratings.

Reported Behavior – If a seller receives multiple complaints, their trust score decreases.

Time on the Platform – Long-time, active sellers gain more trustworthiness than brand-new users.

3. How It Appears in the App

Each seller has a profile page displaying ratings and their trustworthiness score.

Listings may include:

4.8/5 (based on 23 ratings)

Sellx Trust Score: 92/100

Usually responds within 15 minutes

When it comes to rating a purchase (let's say multiple buyers have contacted the same seller about an item), who should be able to give a rating? In this case, I'd like it so that when the seller marks an item as sold, a list of all the buyers who contacted the seller about this item appears, and the seller can choose which buyer they want to mark as having purchased it. Once the buyer is selected, the seller will receive a notification that the purchase is ready for review.

sellx_notifications

notifications should be received in these cases:

1. notifications on messages
2. notifications when an item from the storage search is added
3. when a favorite item is sold
4. when the price of a favorite item is changed
5. notifications that an item is approved when you post it (approved by admin). items should be marked as "pending" until I approve it.
6. notifications on saved searches to email (if the user wants it)

sellx_settings

You should be able to control notifications in the settings

turn on/of notifications for:

1. notifications on messages
2. notifications when an item from the storage search is added
3. when a favorite item is sold
4. when the price of a favorite item is changed
5. Notifications that an item is approved when you post it (approved by admin). items should be marked as "pending" until I approve it.
6. notifications on saved searches to email (if the user wants it)
7. or turn off/on all notifications

sellx_search

There should be a search field on the home page where users can search for all items in the app (regardless of category). When I open the category pages, there should be a search field that belongs only to that specific category page.

When clicking on the search field, a page should open displaying previous search terms (up to 10 words) with an option to delete them. If possible, there should be suggested keywords (for example, if the user starts typing "iph..", suggestions like "iPhone 13 Pro" or "iPhone 14 Pro Max" should appear).

Search results should be displayed and sortable (see *sellx_sorting*).

sellx_sorting

Sorting for different categories:

*Norwegian between brackets
for all categories (most relevant) must be selected by default*

Sellx.

1. oldest first (Eldste først)
2. most relevant (Mest relevant)
3. Newest first (Nyeste først)
4. price high-low (Pris høy-lav)
5. price low-high (Pris lav-høy)

4. price high-low (Pris høy-lav)
5. price low-high (Pris lav-høy)
6. Closest (Nærmest)

sellx_professional_store_profile

Here is a clearer recap of the flow for professional store users.

The idea is that a professional store is not just a normal user profile. It should work more like a mini shop inside the marketplace app.

A professional user can still have a normal personal account, but they can also create one or more professional store profiles using the same login information.

Professional store user flow

1. Register / upgrade to professional store

The user starts with a normal account, then chooses “Create Professional Store” or “Upgrade to Professional Store”.

2. Choose store category

Before creating the store, the user must choose what type of store it is, for example:

- Clothing store
- Electronics store
- Car dealer
- Handmade products
- Furniture
- Services / craftsman
- Beauty / health
- Other

This helps buyers browse stores by category.

3. Create store profile

The professional user should add:

- Store name
- Logo
- Banner image
- Store description
- Location
- Phone number
- Email
- Website / social media links if available
- Opening hours if relevant
- Store category

The store profile should look professional, almost like a mini landing page.

4. Choose payment plan

The professional store should choose a plan:

Free / pay-per-post plan

- Store profile is free
- They pay each time they post an item
- The price per listing should be higher than for normal users

Monthly subscription plan

- Monthly fixed payment
- Unlimited or high number of listings
- Better visibility
- More professional tools

5. **Professional dashboard**

After creating the store, they get a dashboard where they can:

- Edit store profile
- Add/edit/delete products/items
- See all active listings
- See expired listings
- Renew listings
- Promote listings
- Create paid ads
- See payments and invoices
- See views, clicks, favorites, and messages
- Manage customer messages
- Switch between personal account and store account

6. **Posting products/items**

Professional stores can post items like normal users, but the item should clearly show that it belongs to a professional store.

The item should appear:

- Inside the store profile
- In normal search results
- In the correct category together with other items
- Possibly in a separate “Professional Stores” section

When a buyer opens an item, they should see the store name, logo, and a button like “View store”.

7. **Store profile page**

When a buyer clicks the store name, they should see the full store profile.

The store page should include:

- Logo and banner

- Description
- Store information
- All products from the store
- Contact button
- Follow store button
- Reviews/ratings if we add that later
- Featured products
- Paid ads from that store if they have any

8. **Paid ads**

Professional stores should be able to create paid ads.

A paid ad is different from a normal product listing. It can look like an item card, but it is marked as “Sponsored” or “Ad”.

The ad can be used for:

- Promoting the store
- Promoting a product
- Promoting a campaign
- Promoting services

This should be paid separately, even if the store has a subscription plan.

There should also be options to buy more visibility, for example:

- Top of search results
- Homepage placement
- Category placement
- Featured store placement

9. **Buyer interaction**

Buyers should be able to:

- Browse professional stores by category
- Search inside a specific store
- Follow a store
- Message the store
- Save products
- View store reviews
- See whether the seller is professional or private

10. **Unique idea**

To make the professional store feature more unique, we can add a “Store Trust Profile”.

This can include:

- Verified store badge
- Response time
- Number of completed sales
- Customer rating
- Return policy
- Warranty information
- Business registration number if needed
- “Trusted by buyers” badge

This will make buyers feel safer when buying from professional stores.

So, in short:

A professional store should have its own profile, dashboard, products, payment plan, ads, visibility tools, statistics, and buyer trust features. It should feel like a small online shop inside our marketplace, not just a normal user account.

message_screen

On the messaging screen, the following should be displayed:

1. The name and profile picture of the person I am contacting (with the option to click and open their user profile).
2. A button that links to the relevant item, displayed as a rectangular button with the item's image and title.
3. An icon at the top that provides options (block user, report user, delete conversation, cancel).
4. Messages should display the time and sent/read status.
5. Messages cannot be deleted, only copied.
6. It should be possible to send text, images from the gallery, images from the camera, location, and files.

sellx_font_color

Typography specification for app:

Primary font setup:

- iOS: SF Pro (San Francisco / SF Pro Text / SF Pro Display)
- Android: Inter

Font weights:

- Title / Headings: Semibold (600)
- Section titles: Medium (500)
- Body text: Regular (400)
- Buttons: Medium (500)
- Price text: Semibold (600)
- Small metadata (location, time): Regular (400)

Font sizes:

- H1 (Main title): 22
- H2 (Section title): 18
- H3 (Card title): 16
- Body text: 14
- Small text: 12
- Button text: 15
- Price text: 18–20 (Semibold)

Platform mapping:

- iOS → Use SF Pro as system font
- Android → Use Inter (Google Fonts)
- Fallback → system default sans-serif

Notes:

- Same font sizes on both platforms
- Same weights on both platforms
- Line height: 1.3–1.4
- Letter spacing: default (0)

Colors:

Color system for marketplace app

Design goals:

- Soft white light mode (not pure white)
- Soft dark mode (not pure black)
- Dark green as primary accent color
- Clean and minimal UI
- Focus on product images

LIGHT MODE

Background colors:

- Primary background: #F7F8F7
- Secondary background: #F1F3F2
- Card background: #FFFFFF

Primary green:

- Primary: #0F3D2E
- Pressed / hover: #0B2F24
- Subtle background: #E7F2EE

Text colors:

- Primary text: #111111
- Secondary text: #6B7280
- Placeholder text: #9CA3AF

Borders:

- Default border: #E5E7EB
- Active border (green): #0F3D2E

Buttons:

- Primary button background: #0F3D2E
- Primary button text: #FFFFFF
- Secondary button background: #E7F2EE
- Secondary button text: #0F3D2E

DARK MODE

Background colors:

- Primary background: #121414
- Secondary background: #1F2322
- Card background: #181A1A

Primary green:

- Primary: #1F6F54
- Pressed / hover: #195943
- Subtle background: #0F2A21

Text colors:

- Primary text: #F3F4F6
- Secondary text: #9CA3AF
- Placeholder text: #6B7280

Borders:

- Default border: #2A2F2E
- Active border (green): #1F6F54

Buttons:

- Primary button background: #1F6F54
- Primary button text: #FFFFFF
- Secondary button background: #0F2A21
- Secondary button text: #1F6F54

Semantic / utility colors

These colors can be the same in both light and dark mode:

- Rating stars: yellow / gold
- Success: green
- Warning: orange
- Error / destructive: red
- Info: blue (optional)

The developer can choose appropriate shades for:

- Ratings (stars)
- Warning messages
- Error messages

- **Success states**
- **Info messages**
- **Badges and labels**

These semantic colors should:

- **Match their meaning (red = error, yellow = rating, etc.)**
- **Be consistent across both light and dark mode**
- **Not conflict with the primary dark green brand color**

Notes:

- **Same green identity in both modes**
- **Soft backgrounds (no pure white / no pure black)**
- **Green used only for actions (buttons, selected, active)**
- **UI should remain minimal and image-focused**
- **Semantic colors can be shared between light and dark mode**
- **Developer can choose shades that best fit each use case**
